[What This Document Covers](#)

This document is a **central data-focused brief** for the monitoring of the feature, covering everything needed for a successful monitoring post launch. It ensures all stakeholders are aligned on:

1. **How We Measure Success**
2. **Monitoring Requirements** (Tools, logic, importance)
3. **Data Requirements** (Traits & Events)
4. **Dashboard & Reporting Plan** (Tools, tables, schema needs)
5. **Challenges and Decisions** (e.g. when something can't be measured or monitored)

[Feature Overview](#)

[Problem Statement:](#)

We need to define event tracking requirements for the upcoming implementation of new “**First Benefits**” pages within the *Install to Sign-In* user journey. This page will showcase rewards messaging and Pampers Club app features through GIFs or videos. The screen will include **two**

critical CTAs “Create Account” and “Sign In” positioned at the bottom half of the page. Data tracking is required to ensure we can capture user interactions with each CTA effectively.

Solution:

Setup an event every time a user interacts with the CTAs on the new “First Benefits” pages. Specifically, an event should be fired when the “**Create Account**” or “**Sign In**” CTA is clicked, so that interactions can be tracked seamlessly in BDU or Mixpanel.

Figma Design	Membership - Design FY2526H1
Feature Name	Implement first benefits pages during onboarding
Release Date	Commercial Discovery

Open Questions, Challenges & Decisions

	Date	Question / Challenge	Owner	Status	Answer
1	18 Sept 2025	Are the 3 step carousel clickable? if the user can swipe it, can we implement a CTA clicked event?	@Kartikey Rai	DONE	Carousel will be swipeable. Dev team has the capacity to capture swipe gesture.
2	18 Sept 2025	In contentful do you have a category	@Kartikey Rai /	DONE	Image/Video name would be passed

		name ot identify the slide content? (Earn, parenting, redemption, etc)	@Waseem Shahzad		
3	6 Oct 2025	FE Developer stated that it would be difficult to map scrolls on the carousel as it can overlap with the automatic progression	@Waseem Shahzad	DONE	SUGGESTION: consider automatic progression as default and in case if it overlaps with manual progression, consider auto progression event properties

✓ How Will We Measure Success?

- ℹ️ What are we measuring and how will this impact our core KPIs to move the needle

Metric Type	Description
Feature Objective	Improve Install to Sign In KPI and reduce drop off on animation screens while highlighting key features and benefits of the app
Primary Success Metric	CTA clicked, Screen Viewed
Supporting Metrics	Success Signup, Success Login
Evaluation Timeframe	30 days
Benchmarks or Baselines	
Key Segments/Filters	All Markets

Business Questions

What are the Business Questions?

Objective	What we want to measure?	How do we measure this?	KPI Impact

Can showing “Create Account” or “Sign In” CTAs on the new First Benefits pages measurably increase conversions from install to successful sign-in, and which CTA, placement, and message variant drives the highest lift?	Manual interaction with the video carousel, how many users are swiping across these creatives?	Carousel Swipe → carousel_id	Install to SI
	How many users are clicking on “Create an account” and “Sign In” CTA?	CTA clicked → CTA → “Create an account” CTA clicked → CTA → “Sign In”	
How many users engage with the creative via manual carousel interactions?	Carousel swipes based on ‘manual’ or ‘automatic’ slide action	Carousel slide action	

Operational Monitoring Requirements

	Failure Point	Tool (Mixpanel / Power BI)	Data Logic	Comments	Importance for Release (H/M/L)
1	CTA clicked and Screen Viewed events firing on previous animation	Mixpanel		The previous animation screens are reduced and replaced by the	H

	screens: earn_animation, mpf_animation, parenting_animation		new benefits page, the older animation screens must not be visible to the users post new benefits page release	
2	New benefits page receiving Screen Viewed and CTA Clicked events and properties, screen_name: onboarding_first_benefits_page CTA : create_an_account, sign_in	Mixpanel	The events and properties proposed for this new feature must receive event volumes after release	H
